

DT-16 Digital thermometer

High class digital thermometer
with PT1000 sensor probe

termoprodukt

Precise digital measuring device DT-16 min/max/alarm

High class precise measuring device which can be used in many different industries like Pharmacy, Laboratory, Transport and Gastronomy. The device is powered from battery. Comes with integrated probe equipped with PT1000 sensor.

Technical data

Temperature range	-20 °C to 60°C
Sensor Type	platinum PT-1000
Operating temperature	-20 °C to 60 °C
Accuracy	-/+0.3°C (-20°C to 60°C)
Sample rating interval	measurement every 15 seconds
Dimensions	60x120x20mm
Protection	IP65-electronics
Power	Battery Li-ion 3.7V 800mAh
Charging time battery Li-ion	1.5 hours
Case material	ABS
Producer	Termoprodukt

DT- 16 Features:

- Minimum and Maximum temperature
- Screen with backlight
- Light weight (85g)
- Hold function
- Compact shape and ergonomic design
- Micro usb charging port
- Working time on a single charge around 12000 hours
- Simple to set up and use
- Supplied with magnetic mount
- Setting MIN / MAX alarm treshold. Exceeding permissible values is signaled by a sound and light alarm.

Every device is calibrated
